Press Release 4/18

WYBC-FM (94.3) of New Haven recently converted to stereo broadcasting. This step was part of a development program which, during the last two years, has included a power increase to 1200 watts and new recording studios. The work for the $14,00 stereo project was done by the members of the Yale Broadcasting Company, the student owned non-profit corporation which operates WYBC-FM. The work included a complete replacement of older broadcasting equipment and the purchase of new stereo records to supplement the present music libraries. The station features "specialty" programming (folk, classical, jazz) during its broadcast day of 4 P.M. to 2 A.M. An affiliate, Your Community Speaks, does extensive public service broadcasting for the Southern Connecticut listening area.
